

SAFE.

KEY POSITION

Very close to our customers – that is the standard by which we further develop our products and services and align them with the needs of the market. The prerequisite for this is the passion to optimise good solutions, to meet expectations and to exceed them. This is precisely what drives the employees who find a respectful environment and plenty of room for innovative ideas at AMF. Then care and know-how are required in the selection and processing of high-quality materials. The result is convincing with the best quality – Made in Germany.

With a versatile product range for clamping, tightening and locking, AMF has become the leading manufacturer and is always able to meet the respective demand. Quality is also reflected in reliability and durability, because our products show their strengths particularly in continuous operation. For us, the appropriate accessories are naturally part of the complete package – always with the aim of simplifying processes for our customers.

With the founding of the company in 1890, Andreas Maier laid the cornerstone for the continuous success story. In the lock factory in Fellbach, spanners will soon be added to the manufacturing programme and as early as 1928, the assembly line production of the Fellbach locks is introduced. Diversification into workpiece and tool clamping technology is followed by consistent specialisation with various clamping technology systems. AMF quickly develops into a competent partner for many sectors in trade and industry.

LOCKS FOR DOORS AND GATES

When it comes to protection and security, there is no room for compromise. That is why our locks offer the highest level of functionality for outdoor use and convince with their many details. High-quality materials, careful workmanship and sophisticated design are the outstanding features that characterise the entire range.

Doors and gates in outdoor areas primarily fulfil a protective function. At the same time, they also reflect the aesthetic standard associated with the respective property. All products in our lock range fulfil these requirements and needs at the highest quality level. The stainless steel versions maintain their high-quality appearance for a long time: resistant to moisture and acid, they also withstand strong temperature fluctuations and are sure to make a good impression. In addition, the durability of the locks from AMF is impressive, especially when the gates and doors are exposed to high loads in outdoor areas.

The advantages at a glance

- **Sophisticated design**
- **Strict controls for high quality standards**
- **No subsequent treatment necessary**
- **Short delivery times**

On the safe side

Our range is completed by the respective accessories such as door hinges, door keys and a large selection of fittings.

TOGGLE CLAMPS

The versatile range offers the greatest possible safety when it comes to lasting rationalisation successes. There are virtually no limits to our pneumatic or manual toggle clamps in terms of application areas and industries – and this also applies to their particularly long functionality.

The AMF quick-release portfolio is developing dynamically. New variants that are based on the specific requirements in practice are always being added to the proven technology. The wide and fast opening for the exposure and unimpeded removal of the workpiece is an essential common feature.

The advantages at a glance

- Interlock through toggle joint principle
- Ergonomic 2-component handle
- Safety clamping piece with finger protection
- Interlock for clamping screws
- Robust for ambient temperatures from -10°C to +80°C

Easy play with strong types

Favourable power and movement conditions as well as easy handling in long-term use characterise the many toggle clamp variants.

HAND TOOLS

Our screwdrivers and spanners are highly valued in trade and industry. Manufactured with the greatest precision, AMF products remain free of wear marks even after years of use. This ensures the greatest possible safety and a smooth workflow in the workplace.

With an extensive range of hexagon and Torx screwdrivers and spanners, we have been meeting all the usual requirements of industry and trade for many years. High-quality materials are carefully processed for the different versions in various sizes. Experience and know-how ensure that every move is right. So quality pays off in every case and also saves costs for new purchases. Our specialists develop and manufacture special tools to individual specifications, creating perfection that sets standards.

The advantages at a glance

- Strict quality controls for maintaining constant standards
- High profitability due to elimination of tool expenditure and non-productive time
- Tried and tested in practical use
